Summary of positive test results for required Covid testing between August 16, 2021, and March 12, 2022

The dashboard included results reported by individuals who tested outside of MIT's Covid Pass program, including at-home antigen tests. Between August 16, 2021, and March 12, 2022, about one-third of the positive results were from tests not administered through MIT.

Required Covid tests by person type between August 15, 2021, and March 12, 2022

	Tests			Unique individuals		
	Tests	Positive	Positive	Number of People	% of People Testing	
		Cases	Rate	Getting Tested	with Positive Results	
Student	478,488	2742	0.57%	14,502	17.9%
